

LOCAL BREVITIES

The Federal grand jury expects to be through with its labors about the last of next week.

There will be an eclipse of the sun on June 17, visible fairly well on the Coast about sunset.

Mr. and Mrs. George Maile desire to thank their friends for sympathy in their deepest sorrow.

Stanley Stephenson may leave for Hilo on Tuesday to begin a contract for painting the new Masonic temple there.

The new 13-cent stamp is a ringer for the one-cent stamp and a clerk in a local business house lately put two of them on each letter sent to local customers. The letters cost the firm 26 cents each and reached the consignees registered.

The rule that automobiles should not be used on the Tantalus road is not being observed. The last board of supervisors passed a regulation forbidding autos to travel on that road, owing to its zigzag course and its narrowness and the danger to those who drive behind horses. But the autos go there.

PERSONAL.

Rev. Stephen Desha, of Hilo, is recuperating after a severe indisposition.

Mrs. J. R. Wilson, of San Francisco, formerly of Hilo, is visiting her mother, Mrs. McGregor.

Alexander Stobie, father of C. H. Stobie, of the First National Bank, arrived from Hilo yesterday with Miss Carrie Shipman.

W. S. Fleming, formerly Deputy Attorney General here, figures in the defense of a man convicted of manslaughter in Judge Thayer's court, Shanghai.

Mrs. Fiske has deferred her theatrical visit to Honolulu until next year. Robert Mantell is making so much money in New York that he has given up his Australian tour and will not appear here.

Mrs. Jack Myatt, formerly Ella Ziegler, accompanied by her young son and her mother, Mrs. C. W. Ziegler, leaves for the Hawaiian Tuesday. This is Mrs. Myatt's first trip to the States, and she looks forward to it with great pleasure.

A private letter from W. M. Cunningham, at Goldfield yesterday, contains news of the death of his wife on May 28. Mrs. Cunningham has many friends in Honolulu where she lived with her husband until they left for Goldfield a few years ago. She died of Bright's disease after an illness of two weeks.

IN MEMORY OF THE
ODD FELLOWS GONE

The memorial services of the Odd Fellows will take place at Odd Fellows' hall this evening. Following is the program:

Hymn—"We Sing Our Honored Dead"
(Air "America")

We sing our honored dead,
And on their tranquil bed
Proud tribute fling;
Here let our song arise,
Like incense to the skies,
A living sacrifice
To them we sing.

No voice of woe shall wreathe
Amidst the strains we breathe,
With grateful breast;
Theirs was a work well done,
Theirs was a race well run,
Theirs was a victory won
Of peace and rest.

Hymn—"It Is Not Death to Die."

It is not death to die,
To leave this weary road;
And with the Brotherhood on high,
To be at home with God.

It is not death to close
The eye long dimmed with tears,
And wake in glorious repose
To spend eternal years.

It is not death to hear
The stroke that sets us free
From dungeon chain, to breathe the air
Of boundless liberty.

IMPROVEMENT IN
AUTOMOBILE VICTIMS

(Continued From Page One.)

Jim Quinn was somewhat bruised and shaken up and is at his home. Julius Bayer, of the steamship office of H. Hackfeld & Co., was on duty yesterday as usual, but with plaster on his face where his cuts were covered.

As to the autos, all were removed to the von Hamm-Young repair garage. Jim Quinn's car which was burned by the gasoline, was a wreck, a mere mass of twisted iron. The flames did their work thoroughly, and the machine looks as it were material for the scrap heap. It was viewed by scores of auto enthusiasts and wonder was expressed as to whether it could ever be repaired.

Quinn's was a \$4500 car and in ten minutes was reduced to a nominal value. It is believed the car was uninsured. Many of the cars which are for hire at the garages are insured only when they are standing under the sheds or in the repair garages. The moment they leave the sheds, the insurance is off.

Harold Castle's car which was used up at the Hackfeld corner on Fort street was not a wreck by any means, but the rear and right hand sides were crushed in. Strangely enough Stevens' Stoddard-Dayton which overturned on the Moanalua road was damaged least of all. The glass guard and the top hamper were demolished but beyond this there was little injury.

Mr. Stevens recounts the story in the Star that he was endeavoring to frame up a story to give to the newspapers as to how the accident happened. As a matter of fact an Advertiser reporter, with some of Stevens' friends, were in his room in the Progress Block when some one phoned him that an Advertiser man was on the way, and for him to "Keep the story down." Stevens replied: "Let him come on up. I'll give him the story straight. Sure, I'll tell it to him just as it happened. What's the use telling anything else?" Stevens was not aware that an Advertiser man was then in his room.

Stevens is not a "new man" in Honolulu, but he is new in the auto business. He has been in the islands for about three years and has been with the Honolulu Iron Works for a long time.

In all there were sixteen persons in all three automobiles. It is strange that none were killed outright.

Ten p. m.—The condition of Captain Johnson, though better, is such that he will not be able to take the Hawaiian out this week for San Francisco. Reports from the hospital indicate that there is improvement in the cases of all the victims.

Supervisor Quinn, who was at the wheel of the Peerless machine which was demolished at the Hackfeld wharf, is confined to his home on account of injuries received and no one is permitted to see him. He is said to be more hurt than at first supposed as he was jammed by the wheel.

FINE MUST BE PAID.

The collector of the port of San Francisco has been notified by the Department of Commerce and Labor that hereafter the coastwise shipping law relative to the carrying of passengers on foreign vessels between Honolulu and the United States will be met in each instance by the statutory penalty. The decision came in the case of T. W. S. Woods and wife of Stockton. They asked for relief of the penalty of \$200 in each case.

is cleaner, many dairymen have been instructed in modern methods and the product is better handled. Mr. Myhre has even invented a modern dairy barn, which has taken the place of several insanitary stables about here. Nor is his good work confined to the milk and dairy inspection alone. He helps the Food Commissioner in many lines, and when that official is on the other islands, attends to his Oahu work. To put out such a man in favor of one who knows nothing of the business, strikes me as a very bad move indeed. Can't the Mayor be induced to reconsider?

The supporters of Robertson were surprised this morning by an Advertiser special cable stating that Erar had sent a strong cable to Washington urging Woodruff. Robertson was induced to allow his name to be sent in after assurances that he would have the support of the Governor.—Star.

But those assurances, if given at all, antedated the Bar Association speech which took Mr. Robertson completely out of the running. There are but two possibilities now in the field, Mr. Woodruff and Judge H. E. Cooper.

COMMERCIAL NEWS

(Continued From Page Four.)

Ewa advanced during the week from \$27.25 to \$29, with few recorded sales. This is practically the same as the price a month ago, at the commencement of the strike.

Waialua is strong, having advanced from \$89.50 to \$95. Only two sales are recorded during the week, however, of five shares each, the minimum to establish a listed price. The stock closed with bids at \$95 and \$95.25 asked.

Oahu industrials appear not to be affected in the least by the labor trouble, all dealt in during the week showing substantial advances. Inter-Island, Rapid Transit and O. R. & L. show advances. Brewery is strong and there appears to be a demand for others.

For some of the stocks of plantations on the other islands there has been some good advances in the bids. Pioneer was in demand all week, with the price going up from \$162 to \$167.50, closing at 168 asked. Hawaiian C. & S. made a gain of a quarter during the week. Hutchinson dropped back from \$20 to \$19.25, closing with \$18 bid. Kekaha rose ten points, from \$165 to \$175, holders now asking \$180. Honokaa shaded off a quarter.

Paisa advanced from \$220 to \$230 on Monday, with further calls for the stock bringing a demand from the holders for \$250. This came as the result of the crop figures given out for Paisa and Haiku, when an estimate of twenty thousand tons proved to be nearly thirty per cent. too low. The crop will run close to twenty-nine thousand tons.

Stock Exchange Transactions.

The sales of the week, as recorded, are:

Crop Outlook.

In a general way the reports from the plantations are favorable. Some portions of Hawaii have not all the water desirable, but there has been

nothing as yet in the situation to cause any apprehension. Sugar is moving freely, with the stocks on hand not unnecessarily large. There has been an echo of the Oahu strike sentiment on Maui and Hawaii, but the laborers there seem to prefer letting the Oahu men do the fighting. The chances of the strike spreading to the other islands seem to be lessening.

Good reports come from the tobacco fields. Writing from the plantation of the Hawaiian Tobacco Company, on Thursday, C. R. Blacow states: "We are now cutting 250 pounds of green leaf daily. We had one leaf yesterday seventeen inches wide and twenty-five inches long. I never saw a wider leaf. The tobacco grows faster than weeds, as we have but little hoeing."

The pineapple crop is in excellent shape, with every prospect of a good yield.

Continued reports of good growth come from the rubber plantations. At Nahiku the trees are making good stands and the oldest trees are approaching the tapping size. There are only a few of these, however, the main average at Nahiku being as yet quite two years from the time when the work of extracting the latex can be carried on on any commercial scale. A general opinion seems to exist that these trees will be ready for commercial tapping this fall, an altogether mistaken supposition. If they were, it would be miraculous and the day of miracles on Maui has passed. The growth being made by the trees is very satisfactory to those in charge and quite as good as could be hoped for.

Meat Less at Wholesale.

The graziers have put into effect the cut in the wholesale price of beef agreed upon by themselves. This is a reduction of a cent a pound, flat. Improved range conditions produced the cut.

Town Labor Scarce.

Except for the fact—on account of it paradoxically—that the town is full of idle Japanese, there is a scarcity of labor. The wages offered the strike-breakers have drawn out every laborer of the cheaper grade to the fields. One result is that the price of laundry work has been advanced, while stevedoring has suffered.

Real Estate.

The demand for building lots in the suburbs continues. At the same time there is again a scarcity of desirable houses for rent of the cottage class. Rents have held steady, and the tone of the realty market is firm. During the week a number of new residences have been started and the contractors report that they are rushed. Carpenters are scarce and there is a demand for plasterers, it having been necessary to send to the Coast for some of these latter.

Hamakua Ditch Progress.

J. T. McCrosson, who is in town, reports that work on the Hamakua ditch is making substantial headway. A force of eight hundred men is en-

CHILLED BEEF

Good Beef is not necessarily frozen beef, but to be sanitary, and in order that you may have tender beef without paying for tenderloin, it should be thoroughly chilled in cold storage. Beef from slaughterhouse to table can not possibly be tender, nor good. We are offering you Australian Lamb and Beef this week that is very good, and some of the mutton in the lot is almost as sweet flavored and tender enough to suggest mint sauce.

DEEPEST WELL IN THE WORLD.

The record of the deepest well in the world is claimed by France. Situated in Ronchamp (Haute Saone), the Buyer oil well is said to be the deepest that has ever been sunk for industrial purposes. It reaches a depth of 3310 feet. The temperature at the bottom of the well is never less than 115 degrees Fahrenheit when it is 50 degrees Fahrenheit at the mouth of the well. Apart from wells, the deepest boring on the earth's surface is probably that of the Paruschowitz mine, in Upper Silesia. It attains a depth of 6495 feet.

"Be sure and keep inside the libel laws," said the city editor to the cub reporter. The cub's first obituary notice read as follows: "The alleged corpse of Mr. John Smith, asserted by friends to have lived at No. 113 West Jones Street, was said to have been buried at Greenhill Cemetery yesterday."—Cleveland Leader.

BEES AND SPARROWS FIGHT FOR TREE.

A fight between a half dozen English sparrows and a swarm of bees for the possession of an old tree on the lawn of the Serrill house, Main street, was witnessed today by a number of interested spectators. The colony of bees swarmed around the tree and discovering a hole about forty feet from the ground flew in. The first of the army, which filled the air like a miniature cloud, had hardly entered the hole before the sparrows came out ruffling their neck feathers and chattering with anger.

There were six sparrows living in the tree and for five minutes they put up a gallant fight for the possession of their home, but the bees were too much for them, and after a time they slowly flew off, fighting to the last.—Penn. Paper.
